Intake Valves

Canadian, US and foreign Patents Pending

- ❖ Extends pump life by reduction or prevention of explosive decompression.
- ❖ Extends life of surface drives and top end brake mechanisms.
- ❖ Holds fluid to the surface when the pump is shut down.
- ❖ Specifically engineered for horizontal oil wells.
- ❖ Reliable, smooth and shock free operation.
- ❖ Optional pressure relief bypass system.
- ❖ Also proven in vertical applications.
- ❖ Prevents runaway backspins.
- ❖ Pays for itself on the first shutdown.

NBS (no back spin) Intake Check Valve Specifications:

- ❖ Hardened 440 SS check ball
- ❖ 4140 HTSR body, seat and retainer.
- ❖ Optional 17-4 PH Stainless Steel body, seat and retainer.
- ❖ 3 1/2" Model available in NBS and SBS (safe backspin) configuration.
- ❖ 4 1/2" Model 21 lbs x 7" Long x 4 1/2" EUE 8rd male threads, both ends.
- ❖ 5 1/2" Model 40 lbs x 9" Long x 5 1/2" EUE 8 rd male threads, both ends.
- ❖ 6 5/8" Model Specifications to be announced

SBS (Safe Back Spin) Models feature integral internal fixed bypass for safe let down of fluid.
